## **OUR SERVICES DESCRIPTION**

### **DRESSAGE:**

We install computers in judge's cabins for dressage. Assistant of judge will enter points into computer, and they are transmitted into central computer in scoring office operated by Philippe Lienart (our college). He cross checks data with paper records and presents the results. In cabin will be three people – judge, assistant for paper work and assistant for computer.

### **What we provide:**

- 5x PC into judge's cabins to input judge's points in real time
- 1x PC for database
- 1 x PC for Speaker
- network into judge's cabins
- results will be displayed on the big screen

### **What we need:**

- 5x volunteers/assistants to input penalties from judges. We need to speak with them one day before competition for short lecture - to show them software and explain how to do it.
- Judge's cabins prepared one day before competition. Than we can install everything without stress and time pressure.
- Electricity near dressage arena (we connect all cabins together with electricity cables).

### **MARATHON:**

**VIDEOCOM Štancel s.r.o.**

Hlavné nám. 37, 060 01 Kežmarok

Tel: +421 903 906 066

IČO: 36485195, IČ DPH: SK2021727829

E-mail: [stancel@videocom.sk](mailto:stancel@videocom.sk)

Web: [www.videocom.sk](http://www.videocom.sk), [www.liski.sk](http://www.liski.sk),  
[www.microgate.sk](http://www.microgate.sk), [www.raceresult.sk](http://www.raceresult.sk),

We provide LIVE RESULTS from obstacles (the same like example from Topolcianky or IZSAK). In every obstacle is timing device connected by radio to central computer, where are data collected and processed. Results will be presented immediately after carriage leaving the obstacle.

**What we provide:**

- for 8x obstacle we provide display board with the name of the driver and running time, Timing device, photocell, Network transmitting for live results and displayboard
- for sections: timing device with photocell for finish in every section
- display board with running time in start and finish
- 2 x PC with results for chef equips

**What we need:**

- 8x volunteers – one day before competition for one hour lecture. We will explain them how to operate the device. Our technician will support them. Volunteers - timekeepers will care for timing devices. Our technical support will check obstacles and in a case of technical problem they will solve it. In every obstacle we need to have some tent with one table.
- Table and chair for time keepers.
- Tent which needs to be installed one day before marathon. We would like to decide where to place the tent because of position of display boards and data logistic. Contact as with possibility of locations.

**CONES:****What we provide:**

- 1x display board- 2 lines displaying name of the driver, running Time, penalties
- main timing device, 2 x photocell, back up timing device

Pictures how it looks like you can find in our prospect:

[www.microgate.sk](http://www.microgate.sk), [www.raceresult.sk](http://www.raceresult.sk),**SCORING RESULTS:**

We can provide scoring as well. By scoring results we cooperate with mr. LIENART and his software. Please contact us if you want to secure also scoring.

**GENERAL:****What we provide:**

- 3x 37" LED LCD TV - one for Spectators tribune, one for warm up arena, one into VIP tent (or wherever you want, depend on your decision)
- PC with additional LCD for the speakers
- PC server for keeping databases from Dressage and Marathon
- Additional PCs for processing results, back up input ...
- printer for results

**What we need:**

- accommodation and food covering for 5 our stuff during whole competition (we are coming in the evening before competition)
- if you will need a service from mr. Lienart (scoring results), we will need projector
- tent for TV for warm up arena (Chefs equip PCs will be there for marathon also)
- if you are planning to have a big screen, please contact us about specifications for input
- detail map of the area because we need to know position for the scoring office, speaker, judges tower etc.
- speaker's place needs to have place for at least 5 people with tables and chairs
- scoring office with enough tables, internet connection in scoring office, stable electricity source
- video screen operator need to be close to us, or provide cable to connect our PC
- another storage room, with electricity inside. This doesn't need to be close to the scoring office (we don't need to have a source of electricity in area if you cannot ensure it).
